Covid: The woeful case for asymptomatic transmission

By [Clare Craig and Jonathan Engler](#)
<https://tinyurl.com/3ajl2be5> Dec. 20, 2020

Dr Clare Craig, a pathologist, and her colleague Dr Jonathan Engler have examined the research evidence behind the claim that Covid-19 can be transmitted by asymptomatic individuals. They have written an [important paper](#) on the subject which was first published in *Lockdown Sceptics* yesterday.

HARMFUL lockdown policies and mass testing have been justified on the assumption that asymptomatic transmission is a genuine risk. Given the harmful collateral effects of such policies, the precautionary principle should result in a very high evidential bar for asymptomatic transmission being set. However, the only word which can be used to describe the quality of evidence for this is woeful. A handful of questionable instances of spread have been massively amplified in the medical literature by repeatedly including them in meta-analyses that continue to be published, recycling the same evidence base.

There are three types of evidence for asymptomatic spread: studies

showing people test positive while asymptomatic (the bulk of the work); studies measuring viral load and concluding from it that people with no symptoms can transmit virus; and studies showing actual transmission.

The first two are not proper evidence that spread can occur.

It is important to carefully distinguish purely *asymptomatic* (individuals who never develop any symptoms) from *pre-symptomatic* transmission (where individuals do eventually develop symptoms). To the extent that the latter phenomenon, which has in fact happened only very rarely, is deemed worthy of public health action, appropriate strategies to manage it (in the absence of significant asymptomatic transmission) would be entirely different and much less disruptive than those actually adopted.

Many early studies which purported to demonstrate the phenomenon of asymptomatic transmission were from China, yet the fact that Chinese studies are only published following Government approval must bring their reliability into question. Nevertheless, the high volume of these studies spawned significant salience of the issue within the medical community, and an assumption of the likelihood of asymptomatic transmission being an important contributory factor. There then followed a number of meta-analyses examining the issue of asymptomatic transmission which

tended to aggregate and give equal weight to studies regardless of origin or quality. In this way, these meta-analyses, given undue credibility by their association with reputable universities, amplified minimal evidence of asymptomatic spread to an importance the data did not warrant.

Dr. Simone Gold Blows The Lid Off The COVID Lie and Sounds The Alarm About the Vaccines!

[Must See]

<https://t.co/AWdCykdw27?amp=1>
Emily Smith writes; "I had seen this video floating around all week and hadn't had time to watch it until now.

One word: WOW. Another word: post this everywhere!

The Deep State power structure is crumbling, can you feel it?

They're game of censorship, banning and control is being

exposed everywhere from stolen elections to **rigged stock markets** (hello GME!).

I know that's not news to many of you who read WeLoveTrump, but it IS news when the general population is starting to see it and finally truly wake up.

The "elite" are in a tough spot....

Stop censoring and the truth will EXPLODE right now....or keep censoring and tighten down even harder and continue to wake up millions of Americans who may have even voted Democrat but who are looking around now and saying this isn't right!

It's not right to rig elections...

It's not right to stop a free stock market and suddenly tell people they can't buy a certain stock...

So which will they do?

I don't know yet.

All I know is I'm going to keep doing what I've done since 2015 which is broadcasting the TRUTH as loudly as I can.

And that brings me to the wonderful Dr. Simone Gold who is doing the exact same thing, exposing the COVID lie and sounding the alarm on the vaccines!"

And you thought nose swabs were bad! China begins using anal swabs to test for Covid in Beijing because 'they are much more accurate'

- The city of Beijing is using Covid anal swabs on residents amid a fresh outbreak
- The nucleic acid swab needs to be inserted about one inch inside one's rectum
- It is to be rotated for several times before completing the 10-second procedure
- Expert says the derriere method is 'more accurate' than throat and nose tests
