## Well, well, well...look at what the hell just surfaced

rw-connection.com

The *Virology Journal* – the official publication of Dr. Fauci's National Institutes of Health – published what is now a blockbuster article on August 22, 2005, under the heading – get ready for this – "**Chloroquine is a potent inhibitor of SARS coronavirus infection and spread.**" (Emphasis mine throughout.) Write the researchers, "We report...that chloroquine has strong antiviral effects on SARS-CoV infection of primate cells. These inhibitory effects are observed when the cells are treated with the drug **either before or after exposure to the virus, suggesting both prophylactic and therapeutic advantage.**"

This means, of course, that Dr. Fauci has known for 15 years that chloroquine and its even milder derivative hydroxychloroquine (HCQ) will not only treat a current case of coronavirus ("therapeutic") but prevent future cases ("prophylactic"). So HCQ functions as both a cure and a vaccine. In other words, it's a wonder drug for coronavirus. Said Dr. Fauci's NIH in 2005, "concentrations of 10 µM **completely abolished SARS-CoV infection.**" Fauci's researchers add, "chloroquine can effectively **reduce the establishment of infection and spread of SARS-CoV.**"

The [above image](#) is labeled by [Facebook](#) as [False information](#) by their independent fact-checkers. The following comes from the original research.

## Chloroquine is a potent inhibitor of SARS coronavirus infection and spread

### Background

Severe acute respiratory syndrome

(SARS) is caused by a newly discovered coronavirus (SARS-CoV). No effective prophylactic or post-exposure therapy is currently available.

### Results

We report, however, that chloroquine has strong antiviral effects on SARS-CoV infection of primate cells. These inhibitory effects are observed when the cells are treated with the drug either before or after exposure to the virus, suggesting both prophylactic and therapeutic advantage. In addition to the well-known functions of chloroquine such as elevations of endosomal pH, the drug appears to interfere with terminal glycosylation of the cellular receptor, angiotensin-converting enzyme 2. This may negatively influence the virus-receptor binding and abrogate the infection, with further ramifications by the elevation of vesicular pH, resulting in the inhibition of infection and spread of SARS CoV at clinically admissible concentrations.

### Conclusion

Chloroquine is effective in preventing the spread of SARS CoV in cell culture. Favorable inhibition of virus spread was observed when the cells were either treated with chloroquine prior to or after SARS CoV infection. In addition, the indirect immunofluorescence assay described herein represents a simple and rapid method for screening SARS-CoV antiviral compounds.

# DEATH BY MASK: MASK WEARING, BACTERIAL PNEUMONIA INFECTIONS, AND THE 1918 FLU

**In 2008, Dr. Anthony Fauci co-wrote a paper with two colleagues explaining that influenza was not the predominant cause of death during the 1918 flu pandemic.**

This video will show you what he wrote, and that the cause of a rise in infections among mask wearers today matches what Fauci claimed to be the real killer in 1918.

<https://www.bitchute.com/embed/GGRLIPWu44C9/>

Are doctors witnessing the early signs of the next round of deaths due to infections? If so, these deaths won't be from Covid-19 / SARS-COV-2 but from people acting on the advice given by Dr. Fauci.

Why hasn't Dr. Fauci told us about the lethal risks associated with bacterial infections from wearing masks? I thought that the hippocratic oath was to do no harm.

Could mask-induced infections and deaths get labeled as SARS-COV-2 / Covid 19, or Covid 21, which will result in governments enforcing more lockdowns and trying to mandate

vaccinations?

You have a choice, and you can preserve your health, and alter our collective future for the better, by saying no to wearing a mask. Please share this information with others.

# Maine's Rise in COVID-19 Cases Linked to Face Masks

*Gov. Mills' Face Mask Mandate Not Based on Actual Science*

## The Data Shows Prolonged Face Mask Use Increases Risk of Catching Respiratory Illness

By: David Deschesne

The recent rise in COVID-19 cases in Maine could be linked to the prolonged use of face masks by the general public. Scientific data collected in randomized controlled trials over the past sixty years has shown consistently that the use of face masks to stop respiratory viruses is not only ineffective, but face masks may actually cause an increase in respiratory illnesses such as influenza and COVID-19.

Maine's governor, Janet "Big Sister" Mills has been mandating face masks among the public since early Spring ostensibly to stop the spread of COVID-19. However, in light of the voluminous amounts of data that were already available at the time, the move by Big Sister seems to be one based more on psychology and brainwashing than on actual, objective, empirical scientific data.

The U.S. CDC reported a meta-analysis of 10 face mask studies in the February, 2020 edition of its medical journal, *Emerging Infectious Diseases*

actually *increased* the cases of respiratory illness significantly.

Furthermore, a more recent study conducted by the US CDC's COVID-19 Response Team and published in the CDC's *Morbidity and Mortality Weekly Report* showed that there is a 20 times greater chance of catching COVID-19 with prolonged wearing of a face mask when compared to those who never wore a face mask. In that CDC study, it was found that of the

154 new cases of COVID-19, where patients had both a positive PCR test for the purported virus' RNA particle and real symptoms, around 85% reported they wore a face mask often, or always, up to fourteen days prior to symptom onset.

The control group in that study also showed symptoms of some sort of respiratory illness, but had a negative COVID-19 PCR test. In that control group, 88% of the people reported often or always wearing a face mask. Around 4% of both groups reported never wearing a face mask prior to symptom onset.

## What are mRNA vaccines?

Moderna makes them so lets enquire. What is mRNA?

<https://www.modernatx.com/about-mrna#what-is-mrna>

“Messenger RNA, or mRNA, plays a fundamental role in human biology, transferring the instructions stored in DNA to make the proteins required in every living cell. mRNA provides instructions to cells to make protein. Moderna's approach is to use mRNA medicines to instruct a patient's own cells to produce proteins that could prevent, treat, [cause] or cure disease.”

## Moderna's mRNA Platform

“Recognizing the broad potential of mRNA science, we set out to create an mRNA technology platform that **functions very much like an operating system on a computer.** It is designed so that it can plug and play interchangeably with different programs. In our case, the "program" or "app" is our mRNA drug - the unique mRNA sequence that codes for a protein.”

## “Our mRNA Medicines – The ‘Software of Life’”

“Generally, the only thing that changes from one potential mRNA medicine to another is the coding region – the actual genetic code that instructs ribosomes to make protein... We are leveraging the flexibility afforded by our platform and the fundamental role mRNA plays in protein synthesis to pursue mRNA medicines for a broad spectrum of diseases.

We need to get the mRNA into the targeted tissue and cells while evading the immune system. If the immune system is triggered, the resultant response may limit protein production and, thus, limit the therapeutic benefit of mRNA medicines. We also need ribosomes to think the mRNA was produced naturally, so they can accurately read the instructions to produce the right protein.
