Dingoes not native dogs and should be thinned out and removed from Fraser Island

MAY 16 Posted by [Editor, cairnsnews](#)

Letter to the Editor: What absolute stupidity to spend millions of dollars of taxpayer money on a Dingo Fence (CM15/5) when your family cannot get medical attention, when ambulances are waiting long periods to get patients medical attention — that is stupidity you elected into parliament. Politicians who would sooner spend money on dingo's than saving your families' lives.

The socialist Queensland Labour Party has long lost any semblance of sanity, lurching further to the Left of Lenin, jumping to the every whim of Green nutcases, now will spend millions on a wire fence to be erected in pure sand 100 metres from the ocean. This utter stupidity will not prevent contact between unafraid

feral dingoes and humans. Thin them out, remove them from the island, fence off one of their ALP's dozens of mainland national park wastelands and keep a few for their genetic material. There are at least a million feral dogs running across the country.

The Dingoes on Fraser Island need to be removed, they were introduced there years ago, they are not native animals, all native animals are marsupials or monotremes [*].

Genetic studies show Dingoes arrived in Australia with the migration of Southern India aborigines about 4,000 years ago when they migrated from Borneo through Sulawesi to Australia.

DNA shows Dingoes lost multiple copies of a starch digestion gene while living with agricultural people possibly in Borneo, Indonesia, which identifies their origin.

About 4,000 years ago the Tasmanian Tiger or Thylacine existed on the mainland, as it was a solitary animal as dingoes hunt in packs, they eventually wiped out Thylacines.

These dogs should not be allowed in the wild, they are no different to any other feral animal: they are however one of the most intelligent dogs alive and must be kept for breeding. Their genes are what make Australian cattle and sheep dogs the world's smartest and most reliable working dogs. [Read more...](#)

* Monotremes

The echidna and platypus are a separate order of mammals that lay eggs and yet without teats, suckle their young. The milk is secreted by many pores on the female's belly.

EXPLOSIVE! PEOPLE WHO HAD COVID JAB SHOW VIDEO PROOF OF MAGNETS STICKING TO THE INJECTION AREA

Source: <https://tinyurl.com/46ayz6yp>
from <https://humansarefree.com/2021/05/magnets-sticking-to-the-covid-vaccine-area.html>

Why are magnets sticking to the COVID vaxxed?

Yet another truly bizarre and strange COVID phenomenon has occurred, following on from the [bizarre sensation of unvaccinated people suffering ill effects](#) just being around the COVID vaxxed, possibly due to [frequency change](#). This time the phenomenon revolves around

magnetism not frequency, although electricity and magnetism are 2 aspects of the same force, called electromagnetism.

A number of people are reporting, with video proof, that when they apply a small magnet to their injection site (usually the upper arm), right where they got injected with the COVID non-vaccine ([which is a gene-altering device and not a real vaccine](#)), the magnet is sticking!

Yet, when they place this exact same magnet in a different part of their body, it doesn't stick, and just falls right off. Thanks to [TimTruth.com](#) (who did great work investigating the [strange alive fibers found in COVID masks](#)) for compiling this [video](#) and this [video](#) which shows the various people around the world who have recorded this weird phenomenon happening to their own bodies. Thanks also to [Jim Stone](#), who was to my knowledge the first or one of the first to break the story.

Is This COVID Vaxxed Magnet Phenomenon Evidence Of Magnetic Nanoparticles?

Clearly, there is something magnetic in the [COVID non-vaccine](#) concoction which is causing these magnets to stick. Some of these magnets are large magnets you could put on a fridge to hold up papers.

Jim Stone ties this phenomenon in to the fact that some medical clinics have advised patients to wait 6 to 10 weeks after the COVID shot before getting an MRI.

The acronym MRI stands for Medical Resonance Imagery and, for those who don't know, involves using a magnetic field and computer-generated radio waves to create detailed images of the organs and tissues in your body. You have to lay down in a chamber while the procedure happens.

Jim writes:

“I have now confirmed the shot probably contains nanobots, because you are supposed to wait 6 – 10 WEEKS after the shot before you get a MRI most likely because the nanobots have to disperse or the MRI will rip your arm apart ...”

In my earlier article on hydrogel produced by [DARPA](#) and Profusa, I quoted a military article which talked about how the [hydrogel](#) would be composed of 2 parts – “polymer

chains” and “an electronic component.”

It would appear that the nanotechnology being deployed in these [COVID non-vaccines](#) has a metallic element, however as [this article](#) reveals, nanoparticles are composed of synthetic plastics, ceramic particles, metallic particles, sol-gel compounds (gel-like substances made partially from solid particles) and much more – even gases which are condensed and coagulated. [What is stored at -70°C ?]

More Questions Than Answers

This is another story where there are more questions than answers.

If the COVID non-vaccine does indeed contain a lot of metallic nanoparticles, why may it allegedly take them 6-10 weeks to disperse?

What are the health implications of having metal inside your bloodstream with enough charge to hold a magnet in place?

What further physiological disruptions will this COVID non-vaccine engender in those who take it?

Is this the first ghastly step towards the [transhumanistic synthetic person](#), Human 2.0?

With the officially recorded deaths from this thing over 11,000 (according to [US](#) and [European](#) stats), and the real number obviously much

much higher, the COVID non-vaccine is a killer.

Any other drug or medicine having such lethal effects would have been pulled from the market long ago.

One thing is for sure: this wholly unnatural COVID non-vaccine concoction is a vastly different beast than the normal, run-of-the-mill toxic vaccines that humanity has been fed for over a century.

COULD MAGNETIC HYDROGEL EXPLAIN THE COVID VAX MAGNET PHENOMENON?

May 19, 2021 5:42 pm

Could advances in magnetic hydrogel be the reason for the bizarre COVID vax magnet phenomenon? This sensation is becoming very well documented, with numerous COVID vaxxed people worldwide demonstrating on video that a magnet will stick on their arm at the injection site, but nowhere else on their body. <http://TimTruth.com> has released another compilation, this time a 47-minute version with people of all ages and cultures showing what happens. It represents overwhelming evidence that this is a real occurrence, despite what desperate debunkers and vaccine apologists claim, ...[which] isn't a good term for them, since this chemical cocktail injection is a non-vaccine. In some videos, people take the very same magnet off their arm and stick it right back on their fridge where it stays. Metallic nanoparticles is a good guess to explain what could be happening. **This article will look specifically at advances in magnetic hydrogel and whether that could explain the phenomenon.** [Read More...](#)
