Petition to Restore Democracy in Queensland

This petition for Queenslanders need your attention.

Queensland residents draws to the attention of the House that the Public Health and Other Legislation (Further Extension of Expiring Provisions) Amendment Bill, tabled 16 June 2021, will extend Queensland's 'State of Emergency' powers and measures into a third year. There needs to be a public discussion on the great danger posed to Queensland's democracy by all these rolling emergency powers, lockdowns and abrogation of citizens' rights. Powers granted under emergency legislation are supposed to be exceptional and time-limited.

After 18 months, there is no justifiable reason why the Government can't legislate for more reduced powers that allow Government to deal with the situation at hand while restoring many of the State's normal democratic processes.

Your petitioners, therefore, request the House to:

1. Oppose the bill and request the Government prepare a new one that better reflects the paramountcy of Parliament and citizens' rights;
2. Make public, without redaction, all data, modelling and forecasts used by the Government in the decision-making process;
3. End the overuse of delegated legislation, which override the usual checks and balances needed for a functioning democracy;
4. End QR 'sign in' mandates for shops and businesses and allow people who are not at high risk from the virus, due to age or co-morbidities, to resume normal living;
5. Normalise democratic processes and freedoms in Queensland.

Patrick Kings in his defense against a CAD\$1,200 fine for being in a group in breach of having a public meeting of in excess of 10 people. Their meeting was their 200th peaceful street corner protest. Patrick King in his defense a requested from the prosecution; evidence of the isolation of the Sars Cov2 virus obtained not in a laboratory environment like an overspun RT-PCR test. The Judge advised King to subpoena the Chief Medical Officer of Health for Alberta for material evidence that would prove they have isolated the Sars Cov2 virus which would provide the scientific backing for the Public Health Act. They could not produce the science.

Enjoy over 500 pages of the most entertaining and challenging essays on the planet.

Pinwill is an original conceptual thinker with a dry sense of humor and turn of phrase. Whether its politics, national economics, history, theology or money his writing all comes from somewhere different. With the exception of Kindle, you'll need to buy his essays to discover whether you love or hate them. He has even thrown in the first Profit and

Loss Account ever done for the United States, and the first Comprehensive Balance Sheet ever done for Australia, to show us that he is not just a pretty face and a comedian. His "Mongrel Dog" articles are all at the expense of politicians. His pieces on money leave all bankers' ears burning. He proves with very scholarly accounts that modern nations are profitable, and suggests that the profit might be distributed as a National Dividend rather than a National Debt. Yes, he certainly comes from another place and is going to a different one as well. Walk with him for a mile and you will feel the seductive attraction of his destination.

Israeli scientist says COVID-19 could be treated for under \$1/day

**Double-blind study shows Ivermectin reduces disease's duration and infectiousness
FDA and WHO caution against its use**

Ivermectin, a drug used to fight parasites in third-world countries, could help reduce the length of infection for people who contract coronavirus for less than a \$1 a day, according to recent research by [Sheba Medical Center](#) in Tel Hashomer.

Prof. Eli Schwartz, founder of the Center for Travel Medicine and Tropical Disease at Sheba, conducted a randomized, controlled, double-blinded trial from May 15, 2020, through the end of January 2021 to evaluate the effectiveness of ivermectin in reducing viral shedding among nonhospitalized patients with mild to moderate COVID-19.

Ivermectin has been approved by the US Food and Drug Administration since 1987. The drug's discoverers were awarded the 2015 Nobel Prize in medicine for its treatment of

onchocerciasis, a disease caused by infection with a parasitic roundworm.

Over the years, it has been used for other indications, including scabies and head lice. Moreover, in the last decade, several clinical studies have started to show its antiviral activity against viruses ranging from HIV and the flu to Zika and West Nile.

The drug is also extremely economical. A study published in the peer-reviewed American Journal of Therapeutics showed that the cost of ivermectin for other treatments in Bangladesh is around \$0.60 to \$1.80 for a five-day course. It costs up to \$10 a day in Israel, Schwartz said.

In Schwartz's study, some 89 eligible volunteers over the age of 18 who were diagnosed with [coronavirus](#) and staying in state-run COVID-19 hotels were divided into two groups: 50% received ivermectin, and 50% received a placebo, according to their weight. They were given the pills for three days in a row, an hour before a meal.

Nearly 72% of volunteers treated with ivermectin tested negative for the virus by day six. In contrast, only 50% of those who received the placebo tested negative. Read more **IN ADDITION**, the study looked at culture viability, meaning how infectious the patients were, and found that only 13% of ivermectin patients were infectious after six days, compared with 50% of the placebo group – almost four times as many. The study appeared on the [MedRxiv](#) health-research sharing site.
