Australian hospitals are filling up with elderly vax victims, few with actual Covid infections which are being caused by those who have been vaxxed

"I understand that most of the patients are vaccinated, even 'severe' patients. Exactly. Naturally occurring. Old people, most of them are vaccinated," Israeli Dr. Kobi Haviv told News Israel 13 Thursday.

<https://www.globalresearch.ca/israel-i-australia-report-95-99-hospitalized-fully-vaccinated/5752476>

Dr. Haviv claimed that the "effectiveness" of the vax was wearing off. I would say that the vaccine's effects are just now becoming obvious.

Prof Zimmerman warns government Covid measures are unlawful

Hospitals filling up with vaxxed patients

by [Editor, cairnsnews](#)
by *Kev Moore*

The vast majority of Covid patients now are people who have received the jab. The media tries to blame the new variant on un-vaxxed people, but the facts speak for themselves.

Reports coming out of Israel claim hospitals are being filled with vaccinated people, 95 percent of whom are suffering serious illness being fully vaccinated.

Sydney campus. Dr Zimmermann was chairman and professor of constitutional law at Murdoch University from 2007 to 2017. He is also a former Law Reform Commissioner in WA (2012-2017) and President of the Western Australian Legal Theory Association (WALTA).

Professor Augusto Zimmerman, former Chairman of Constitutional Law at Murdoch University and Professor of Law at Notre Dame Sydney warns governments that compulsory vaccination and related medical procedures are unlawful. This includes vaccine passports.

One of the most remarkable characteristics of the Australian Constitution is its express limitation on governmental powers. *(emphasis added)*

In drafting the Constitution, the framers sought to design an instrument of government intended to distribute and limit the powers of the State. This distribution and limitation upon governmental powers was deliberately chosen because of the proper understanding that unrestrained power is always inimical to the achievement of human freedom

and happiness.

As such, the Constitution allocates the areas of legislative power to the Commonwealth primarily in sections 51 and 52, with these powers being variously exclusive or concurrent with the Australian States.

The Constitution was slightly amended in 1946 by a referendum in order to include [section 51 \(xxiiiA\)](#). This provision determines that the Parliament, inter alia, can make laws with respect to:

The provision of ... pharmaceutical, sickness and hospital benefits, medical and dental services (but not so as to authorise any form of civil conscription) benefits to students and family allowances...

As can be seen, this provision allows for the granting of various services by the federal government but not to the extent of authorising any form of civil conscription. The prohibition of such conscription is directed particularly to the provision of medical services.[\[1\]](#)

The idea that constitutional provisions protect individual rights plays a fundamental role in our understanding of these express limitations and, indeed, our understanding of the implied constitutional limitations derived from them. In this context, the “no conscription” requirement to be found in that provision amounts to an explicit constitutional limitation.

It is an implied constitutional right of the individual so that such prohibition is not directed only to the federal government but it must also be extended to the exercise of legislative power by the Australian states.

In other words, no Australian government, either federal or state, or those acting on its behalf, is constitutionally authorised to force any individual to take medicament against his or her own will, or force them or their children to be, among other things, compulsorily vaccinated.

The concept of 'civil conscription' was first considered by the High Court in [British Medical Association v Commonwealth](#) (1949) 79 CLR 201; [1949] HCA 44 (7 October 1949). That case involved federal legislation which required medical practitioners to comply with a particular federal medical determination as part of a scheme to provide pharmaceutical benefits.

In other words, that case was about the validity of legislation which compelled medical practitioners to render a particularly medical-pharmaceutical service. (emphasis added):

In his written judgement Justice Williams stated: Accordingly, in my opinion, the expression invalidates all legislation which compels medical practitioners or dentists to provide any form of medical service” (emphasis ours). [2]... ([Read more](#))

Dr. Sherri Tenpenny Explains How Depopulation Covid Vaccines Will Start Working In “4 To 14 Months”

Source: <https://tinyurl.com/3brwetak>

Dr. Sherri Tenpenny gives VERY important information! She talks about instances of hyper-immune response in test animals during previous attempts at coronavirus vaccines, like SARS and MERS, which has been a persistent problem.

All seems well for awhile, until the animals are exposed to the wild mutated virus. To her, it's clear that the same will happen with humans.

Dr. Tenpenny and other scientists predict that millions may die from the vaccine but it will be blamed on a new strain of COVID – to make an argument for even MORE deadly vaccines.

“We're at a critical juncture in time for all of humanity on a lot of different levels. And we are past the time of hand-holding, pussy-footing around, being careful to not offend anybody and being so gentle with the snowflakes – we just can't do it anymore... We've been doing these

vaccinations in America for a month. And in 30 days, we have over 40,000 adverse events reported to the Vaccine Adverse Event database...we have over 3,100 cases of anaphylactic shock, we have over 5,000 neurological reactions, which can range from headaches, to numbness and parasthesias, to headaches, to dizziness to vertigo, to feeling like you can't feel your hands and your feet – in 30 days!

“And it's been estimated that less than 10% of adverse reactions that occur are reported to VAERS...

“Can you think of one single product, in any industry – ANY industry – for as long as products have been made on the planet, that within 30 days, we have 40,000 people complaining of side effects – that not only is still on the market but is full-court-press and we've got paid actors telling us how great they are for getting their vaccine.

“And we're offering people \$500 if they will just get their vaccine. And we've got nurses and doctors going, 'I got the vaccine! I got the vaccine!' Well, they're not going to be so happy when they start to get their Bell's Palsy, when they start to get their neuropathies, when they get their cardiac arrhythmias, when they get their ITP, their autoimmune reaction that causes them to die of a blood disorder, they're not going to be so happy then.

“But we're never going to see pictures of those people.”

Dr. Sherri Tenpenny 8 Ways the mRNA COVID Vaccine Can Kill You

(video 6:28) 2021/04/22

<https://www.bitchute.com/video/JmNwCp5ljt0g/>

Dr Sherri Tenpenny has mapped out ten mechanisms of action of how the mRNA vaccine is going to kill people. She says, “When you inject the mRNA, the Messenger RNA starts to code for the spike protein...the NIH is now fighting with Moderna over patent rights, because you can't patent anything that's out in nature, so they had to manipulate the spike protein, in order to be able to patent it and then make an antibody to the spike protein.

“Well, this anti-spike protein antibody is deadly. It's absolutely deadly. And the first three papers I went through, I found that one of the things the spike protein does is it directly attacks lung tissue and breaks it down. “The second thing that it does is it inhibits your M2 macrophages, which are your anti-inflammatory macrophages, so you get cytokine storm and you die.

pandemic in Australia within 6-8 weeks.”

“The three medications are now on chemist shelves right now. GPs can email GP@CDD.com.au to obtain the dosing protocol and COVID-19 treatment information for their patients.”

“GPs can legally prescribe the therapy today as an “off label” treatment according to Australian Guidelines – a standard practice in medicine.”

“In fact more than 60% of prescriptions in Australia are “off-label”. It’s not a new concept. It’s happening every day to manage diseases and save lives.”

“The Government could end the pandemic by openly encouraging GPs to prescribe these TGA approved medications. Those who test positive, are identified in contact tracing, as well as those in high-risk groups like the elderly and healthcare workers, can then access the therapy quickly.”

Ivermectin was discovered in the 1970s and is on the World Health Organization (WHO) list of essential medicines.

“There is mounting worldwide clinical literature pointing to a 100% cure rate using Ivermectin Triple Therapy,” said Professor Borody.

August 13, 2021 **The Centre for Digestive Diseases issued today a press release titled “Ivermectin Triple Therapy Protocol for COVID-19 Released to Australian GPs for Infected Elderly and Frontline Workers.”**

This early treatment protocol combines ivermectin with doxycycline and zinc. “Triple therapy specialist Professor Thomas Borody, famous for curing peptic ulcers using a triple antibiotic therapy saving millions of lives, today released the COVID-19 treatment protocol to Australian GPs, who can legally prescribe it to their COVID-19 positive patients. They can also prescribe it as a preventative medication. Borody says this could be the fastest and safest way to end the
