Queensland Lockdown

Greater Brisbane will enter a three day lockdown in a bid to contain a potentially crippling outbreak of a mutant strain of COVID-19.

Residents in Brisbane, Ipswich, Logan, Moreton Bay and Redlands council areas will only be able to leave their home for four reasons from 6pm on Friday until 6pm on Monday, and will have to wear a mask when they are outside their residence.

During this period, funerals will be limited to 20 people, weddings to 10, and authorities have urged people not to go to non-essential businesses, including gyms.

All this as, [Dave Pellowe](#) [opined](#) on 8 Jan, 2021 “... because one single person in the last 114 days has been diagnosed with the Wuhan Flu.

“For those under 60 (the vast majority of the working population) 99.9% will not die *if* they catch it. Queensland recorded exactly zero new local cases of the Wuhan Flu today, but the ruling bureaucracy decided house arrest for everyone in the cities of the Brisbane region would be the perfect policy to prevent further spread. **Zero is a number the bureaucrats want to reduce.**”

“We are doing this to make sure we are keeping Queenslanders safe. Let's call it a long-weekend at home!” Ms Palaszczuk said.

“Such cynical, shameless stoking of fear and stroking of emotions was all it took, along with an absent argument or discernable difference from her opponent in the election less than 3 months ago, to sweep the Premier back into power. Voters thronged in October to give her their freedom like Ancient Israel begged to be [ruled by a King in exchange for their freedom](#).

“Democracy dulls the senses, stupifies the citizens, and lulls the lazy into a false sense of security. Like a weighty doona, the ratcheted increase in smothering government is welcomingly snug.

“No one has died or is dying in Queensland because of the Wuhan Flu. No one is intubated, no one in intensive care, no one even hospitalised.

“We voted for a fear-mongering, liberty-thieving regime which campaigned on killing people who'd given up hope, instead of properly funding palliative care training and services to solve needless suffering. The government is piling oppressive burdens on the shoulders of those who can least bare them, and consolling us that we're all being oppressed together, by problems their own excessive policies created.

Unusual Features of the SARS-CoV-2 Genome Suggesting Sophisticated Laboratory Modification Rather Than Natural Evolution and Delineation of Its Probable Synthetic Route

Abstract

The COVID-19 pandemic caused by the novel coronavirus SARS-CoV-2 has led to over 910,000 deaths worldwide and unprecedented decimation of the global economy. Despite its tremendous impact, the origin of SARS-CoV-2 has remained mysterious and controversial.

The natural origin theory, although widely accepted, lacks substantial support.

The alternative theory that the virus may have come from a research laboratory is, however, strictly censored on peer-reviewed scientific journals.

Nonetheless, SARS-CoV-2 shows biological characteristics that are inconsistent with a naturally occurring, zoonotic virus.

In this report, we describe the

genomic, structural, medical, and literature evidence, which, when considered together, strongly contradicts the natural origin theory.

The evidence shows that SARS-CoV-2 should be a laboratory product created by using bat coronaviruses ZC45 and/or ZXC21 as a template and/or backbone.

Building upon the evidence, we further postulate a synthetic route for SARS-CoV-2, demonstrating that the laboratory-creation of this coronavirus is convenient and can be accomplished in approximately six months.

Our work emphasizes the need for an independent investigation into the relevant research laboratories. It also argues for a critical look into certain recently published data, which, albeit problematic, was used to support and claim a natural origin of SARS-CoV-2.

From a public health perspective, these actions are necessary as knowledge of the origin of SARS-CoV-2 and of how the virus entered the human population are of pivotal importance in the fundamental control of the COVID-19 pandemic as well as in preventing similar, future pandemic

1. Has SARS-CoV-2 been subjected to in vitro manipulation? (page 2)

2. Delineation of a synthetic route of SARS-CoV-2 (page 14)

3. Final remarks..... (page 20)

Many questions remain unanswered about the origin of SARS-CoV-2. Prominent virologists have implicated in a *Nature Medicine* letter that laboratory escape, while not being entirely ruled out, was unlikely and that no sign of genetic manipulation is present in the SARS-CoV-2 genome.

However, here we show that genetic evidence within the *spike* gene of SARS-CoV-2 genome (restriction sites flanking the *RBM*; tandem rare codons used at the inserted furin-cleavage site) does exist and suggests that the SARS-CoV-2 genome should be a product of genetic manipulation.

Furthermore, the proven concepts, well-established techniques, and knowledge and expertise are all in place for the convenient creation of this novel corona virus in a short period of time.

Motives aside, the following facts about SARS-CoV-2 are well-supported:

1. If it was a laboratory product, the most critical element in its creation, the backbone/template virus (ZC45/ZXC21), is owned by military research laboratories.
2. The genome sequence of SARS-CoV-2 has likely undergone genetic engineering, through which the virus has gained the ability to target

humans with enhanced virulence and infectivity.

3. The characteristics and pathogenic effects of SARS-CoV-2 are unprecedented. The virus is highly transmissible, onset-hidden, multi-organ targeting, sequelae-unclear, lethal, and associated with various symptoms and complications.

4. SARS-CoV-2 caused a worldwide pandemic, taking hundreds of thousands of lives and shutting down the global economy. It has a destructive power like no other.

Judging from the evidence that we and others have gathered, we believe that finding the origin of SARS-CoV-2 should involve an independent audit of the WIV P4 laboratories and the laboratories of their close collaborators. Such an investigation should have taken place long ago and should not be delayed any further.

We also note that in the publication of the chimeric virus SHC015-MA15 in 2015, the attribution of funding of Zhengli Shi by the NIAID was initially left out. It was reinstated in the publication in 2016 in a corrigendum, perhaps after the meeting in January 2016 to reinstate NIH funding for gain-of-function research on viruses. This is an unusual scientific behavior, which needs an explanation for.

What is not thoroughly described in this report is the

various evidence indicating that several coronaviruses recently published (RaTG1318, RmYN0230, and several pangolin [*scaly anteater*] coronaviruses) are highly suspicious and likely fraudulent. These fabrications would serve no purpose other than to deceive the scientific community and the general public so that the true identity of SARS-CoV-2 is hidden. Although exclusion of details of such evidence does not alter the conclusion of the current report, we do believe that these details would provide additional support for our contention that SARS-CoV-2 is a laboratory-enhanced virus and a product of gain-of-function research.

A follow-up report focusing on such additional evidence is now being prepared and will be submitted shortly.

WHO Virus Mission to China in Disarray as Entry Denied

Source: <https://tinyurl.com/y59asflc>

An expert mission to China to find the origins of the coronavirus pandemic stumbled before it even began, with the head of the World Health Organization complaining that Beijing was blocking the team from entering the country.

WHO chief Tedros Adhanom Ghebreyesus said he was "very disappointed" with the last-minute bar on entry, in a rare castigation of Beijing from the UN body. A 10-strong team was due to arrive in China this week after months of painstaking negotiations.

Beijing is determined to control the origin story of the virus, which has killed more than 1.8 million people so far and laid waste to global economies.

But Beijing has so far resisted pressure for a full independent probe into the early days of the outbreak. Instead, it has seeded doubt as to whether the pandemic even started inside its borders.

The WHO mission was billed as a way to cut through the rancour and seek clear answers on how the virus jumped from animals to humans.

But with some of the team already in transit, Beijing had yet to grant them entry, the WHO chief said.

The mission was hugely sensitive and neither the WHO nor China had until now confirmed when specifically it was due to start. WHO emergencies director Michael Ryan told Tuesday's briefing that the problem was a lack of visa clearances. "We trust and we hope that this is just a (logistical) and bureaucratic issue that can be resolved very quickly."

There was no immediate comment from China.
