From Cops for Covid Truth

This is a text message C4CT received today. Could be helpful.

Just heard from a good friend in Qld who is a retired magistrate and was even a speech writer for senior politicians, that if you are refused service for any reason, not signing in, not wearing a mask, not being jabbedjabbed, never defend your position just speak to the manager/owner etc and ask them to put their refusal in writing so you can pass it on to your solicitor. In EVERY instance my friend did this, the refusal was withdrawn with an apology. Worth considering. No business or even government agencies want the threat of possible legal action.

[DEC 12](#) by [Editor, cairnsnews](#)

Up to Nov 19, the US recorded 14,428 myocarditis cases in children – VAERS

by Dr Joe Mercola

<https://articles.mercola.com/sites/articles/archive/2021/12/11/covid-vaccines-are-killing-people.aspx>

Dr. Peter McCullough, a cardiologist, internist and epidemiologist, and editor of two peer-review journals, has been on the media and medical frontlines fighting for early COVID treatment.

Dr Peter McCullough warns thousands of kids will be killed or maimed by unnecessary Covid shots.

McCullough has also been outspoken about the potential dangers of the COVID shots, and the lack of necessity for them. Curiously, agencies that are currently calling the shots do not have the authority to dictate how medicine is practised...

... COVID Shots Are Dangerous and Ineffective

When it comes to the COVID injections, McCullough cites research showing those at highest risk of dying from COVID-19 are also at highest risk of dying from the COVID shot. Additionally, the shots are causing severe heart damage in younger

people whose risk of dying from COVID is inconsequential.

He points out the safety signal is very clear, with 19,249 deaths having been reported to the U.S. Vaccine Adverse Events Reporting System as of November 19, 2021.³

The signal is also consistent both internally and externally. A number of side effects are reported in high numbers, and very close to the time of injection, that validate the suspicion that the shots are at fault. The U.S. data are also consistent with data from other countries, such as the Yellow Card system in the U.K.

Despite that, not a single safety review has been conducted to weed out risk factors and the like. “We’re almost a year into the program and there’s been no attempt at risk mitigation,” McCullough says. At the same time, there have been gross attempts to coerce Americans into taking the shots — everything from free beer or a free lap dance, to million-dollar lotteries and paid scholarships to state universities.

Such enticements are an undeniable violation of research ethics that strictly forbid any and all kinds of coercion of human subjects. As suspected and predicted, no sooner had bribery stopped working than government officials started talking about vaccine mandates...

“The fact that there’s no safety report, they’re not telling you if you’re

taking the best vaccine, the fact that it's kind of in a distorted way linked to your ability to work and go to school, that we're violating the Nuremberg Code, violating the declaration of Helsinki — it's just not adding up. It's not looking good for those who are promoting the vaccine," McCullough says.

Add to all that the now-clear finding that the shots offer only limited protection for a very short time — six months at best. According to McCullough, there are more than 20 studies showing efficacy drops to nothing at the six-month mark.

I've often stated that, in all likelihood, your risk of side effects will rise with each additional shot.

McCullough cites research showing your body will produce the toxic SARS-CoV-2 spike protein for 15 months. If your body is still producing the spike protein — which is what's causing the blood clots and cardiovascular damage — and you take an additional shot every six months, there will come a time when your body simply cannot withstand the damage being caused by all the spike protein being produced.

Also consider this: While you only get at most six months' worth of protection from any given shot, each injection will cause damage for 15 months. If we continue with boosters, eventually, it's going to be impossible to ever clear out the spike protein.

Chlorine dioxide aqueous solution can inactivate the binding of the variant spike proteins to the human ACE2 receptor protein

Proof that chlorine dioxide aqueous solution can inactivate the binding of the variant spike proteins to the human ACE2 receptor protein. This means that if you have had the VAX and you need to get rid of the spike proteins it will work.
