British children up to 52 times more likely to die following a COVID shot: gov't report

Source: [David McLoone Wed Feb 2, 2022](#)

Data from Britain's Office for National Statistics show a stark increase in deaths among children both single- and double-jabbed compared to their un-jabbed counterparts.

LONDON ([LifeSiteNews](#)) – Britain's Office for National Statistics (ONS) has [released data](#) indicating that children who received the COVID-19 jabs have suffered a death rate 54 times greater than that of their un-jabbed counterparts.

In December, the ONS published age-standardized data on the mortality rates of individuals in 5-year age sets in Britain, grouped by their “vaccination” status for the COVID-19 shots. The data accounts for the period from January 1 to October 31, 2021.

The ONS tabulated “Monthly age-standardised mortality rates by age-group and vaccination status for deaths involving COVID-19, per 100,000 person-years” but presented the data only for ages 18 and over. However, the jabs are [available](#) to children as young as 12, and those children are [allowed](#) to receive the shot against their parents' wishes. In limited cases, children as young as 5 have been given a reduced dosage of the shots.

Nevertheless, as [noted](#) by *The Exposé*, a separate table outlining “deaths and person-years by vaccination status” includes 5-year age groups from 10-years-old and up. From the data provided, a calculation of the mortality rate per 100,000 person-years can be made.

The rate per 100,000 person-years delineation is used in preference over the simpler 100,000 population calculation to better represent the mortality rates over a specific period of time, as people in one “vaccination” group – such as un-jabbed, single-jabbed, and double-jabbed – soon move into the next group.

Table 9 of the ONS report shows the “deaths and person-years by vaccination status and five-year age group” for the entire ten-month period. According to the report, the un-jabbed 10–14-year-old group represents 2,094,711 person-years, and the 15–19 age set 1,587,072 person-years over the same time.

Table 9: Whole period counts of deaths and person-years by vaccination status and five year age group, England, deaths occurring between 1 January 2021 and 31 October 2021¹

Vaccination status	Age group	Person-years	Deaths involving COVID-19	Non-COVID-19 deaths	All deaths
Unvaccinated	10-14	2,094,711	2	94	96
Unvaccinated	15-19	1,587,072	18	142	160

Table 9, ONS Report

From the above table the 100,000 person-years calculation can be made, with the younger group coming out at 20.9 un-jabbed per 100,000 person-years and the older group at 15.9. Following this, the mortality rate per 100,000 person-years is worked out by dividing the number of deaths within each group by the 100,000 person-years calculation.

The result is that for the 10–14 year group, the un-jabbed mortality per 100,000 person-years is 4.6 while the un-jabbed mortality rate per 100,000 person-years for the 15–19 group is 10.1.

Using the same data set and calculation, the mortality rate for 10–14-year-olds who received one dose of the jabs suffered a 45.1 per 100,000 person-years death rate, while 15–19-year-olds with one jab suffered 18.3 deaths per 100,000 person-years.

Table 9: Whole period counts of deaths and person-years by vaccination status and five year age group, England, deaths occurring between 1 January 2021 and 31 October 2021¹

Vaccination status	Age group	Person-years	Deaths involving COVID-19	Non-COVID-19 deaths	All deaths
Received only the first dose, at least 21 days ago	10-14	6,648	0	3	3
Received only the first dose, at least 21 days ago	15-19	174,667	0	32	32

Table 9, ONS Report

Table 9: Whole period counts of deaths and person-years by vaccination status and five year age group, England, deaths occurring between 1 January 2021 and 31 October 2021¹

Vaccination status	Age group	Person-years	Deaths involving COVID-19	Non-COVID-19 deaths	All deaths
Received the second dose, at least 21 days ago	10-14	1,678	0	4	4
Received the second dose, at least 21 days ago	15-19	127,842	1	41	42

Table 9, ONS Report

Among those who received two doses of the COVID jabs in both young age groups, the death rates were higher still, with 32.9 deaths per 100,000 person-years among the 15–19 age group and a staggering 238.4 deaths per 100,000 person-years among 10–14-year-olds in the U.K.

The data show a stark increase in deaths among children both single- and double-jabbed compared to their un-jabbed counterparts. For children aged 15–19, the risk of death increases by almost double if they take the first shot and by over three times if they take the second.

10–14-year-olds, on the other hand, run the risk of dying almost by a factor of ten following the first dose while the second dose brings a 51.8 times greater risk of death than if they had remained un-jabbed.

On average, it means that children between 10 and 19 years of age who had received at least one shot of the COVID jabs had a 3.7 times greater chance of dying between January and October last year.

ACT OF WAR: Thanks to covid “vaccines,” the military's cancer rate has more than **TRIPLED**

([Natural News](#)) America's armed forces have been in the throes of [a mass die-off event](#) ever since Wuhan coronavirus (Covid-19) "vaccines" were forced on all servicemen.

At the recent "COVID-19: A Second Opinion" panel that was hosted in Washington, D.C., Sen. Ron Johnson (R-Wisc.) dropped numerous bombshells showing that Fauci Flu shots are neither safe nor effective as claimed.

Doctors and other expert panelists presented damning data showing that not only are the injections a serious medical problem, but the government's handling of it amounts to a coordinated coverup of Big Pharma's evil deeds.

Attorney Thomas Renz reportedly told conservative commentator Daniel Horowitz from *The Blaze* the details about the [cancer epidemic sweeping through the military](#). Here is what Horowitz tweeted in a follow-up to the gathering:

"I can share with you from attorney Thomas Renz that the number of cancer diagnoses in the military's DMED system went from a 5-year average (2016-2020) of 38,700 per year to 114,645 in the first 11 months of 2021. This is a predominantly young population."

"Unlike VAERS where the naysayers can suggest that anyone can submit, this is only by military doctors and quantifies every single ICD code in the military for tri care billing of Humana. This is the ultimate defined and finite population with excellent surveillance."

Horowitz also shared a video of Renz speaking at the panel about other

mind-blowing data he accumulated from several whistleblowers whose credentials, he said, "are impeccable." One of them is one of the only Green Beret doctors in the military. (Related: Renz is the same guy [who warned](#) that everything about the *plandemic* is centered on fear and manipulation rather than facts.)

Attorney Thomas Renz reveals what multiple DoD whistleblowers have provided on the safety signals they are seeing. These numbers are mind blowing! [@SenRonJohnson pic.twitter.com/gS4fhwF1Po](#) — Chief Nerd (@TheChiefNerd) [January 24, 2022](#)

"One of the biggest takeaways here is that the data is beyond reproach and widely accessible by the DoD, CDC, FDA, and across the Biden-Harris regime. In other words, they are all very well aware that the jabs are almost certainly causing an untenable increase in cancer in otherwise young and healthy military-age Americans and they're keeping that information away from the people."

America's military is being killed off by covid injections

In a perfect world, what Renz alone said at the panel would have been more than enough to convince the government to immediately halt the jab push while reevaluating the data and coming up with a new plan. That reevaluated data would then have been publicly released for independent scrutiny.

The world is far from perfect, though. Instead of honesty and transparency, the government has instead chosen deception and secrecy when it comes to the "science" behind the injections.

"We have substantial data showing that we saw, for example, miscarriages increasing by 300 percent over the five-year average, almost," Renz further explained at the panel. "We saw an almost 300 percent increase in cancer over the five-year average." Since the corporate-backed media will never report on any of this, it is up to you and others like you to share it with anyone who might be willing to listen.

"We saw – this one's amazing – neurological," Renz added in his presentation. "So, neurological issues which would affect our pilots, over 1,000 percent increase. 1,000." "Ten times," Sen. Johnson then interjected. "That's 10 times the rate." "82,000 per year to 863,000 in one year," Renz continued. "Our soldiers are being experimented on, injured, and sometimes possibly killed."
